

SecuLam P6B

Lightweight burglary resistant glazing

Allplast has developed its own anti-burglary glazing according to standard EN356. Our goal has been to come up with extremely thin and lightweight products, which do not require special handling or maintenance. The result is a range of products that cover the top level of anti-burglary protection, starting with our SecuLam P6B laminate.

SecuLam P6B is lightweight, thin and scratch resistant due to its glass surfaces on both inside and outside. Interlayers keep glass fragmentation to a minimum. Tests have proven its high resistance against

forced entry attempts with a hammer and axe. Thermally insulated versions of this product are available.

Our laminates can also be used in other applications, such as industrial safety glazing. For such applications, custom products can even be designed.

	SecuLam P6B	SecuLam P7B	SecuLam P8B
Composition	Glass-Polycarbonate-Glass	Glass-Polycarbonate-Glass	Glass-Polycarbonate-Glass
Thickness	10 mm	11 mm	13 mm
Specific weight	19 Kg/m ²	20 Kg/m ²	22 Kg/m ²
Protection level	EN356 level P6B	EN356 level P7B	EN356 level P8B
Options	Insulating, colouring, anti-spall layer (to prevent fragmentation on inside)		

The information in this brochure is given in good faith and to the best of our knowledge, but without warranty. Each user of our materials and products should determine himself the suitability for a specific application and he/she is also liable for observing any proprietary or third party rights. It is always recommended to perform preliminary tests, since any test results on our products have been obtained under controlled conditions. Technical data concerning our products are typical values.
